## **Experience**

## Frontend Developer Internship | Website

Sep 2022 - Nov 2022

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

#### Freelance Frontend Developer

July 2022 - Current

Self Employed

- Delivered professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practises
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

## **Frontend Developer Support**

July 2022 - Current

Frontend Simplified

- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practises
- Utilized debugging best practises using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests

## **Projects**

#### Personal Website | Website | GitHub

 Developed a personal website showcasing programming skills and projects (source code and live links provided).

#### **Automotive Affection | Website**

- Developed a fully-functional website for an Australian car detailing company using React.
- Features a completely responsive design and online appointment booking.

#### E-Portfolio Template | Website

- Designed & developed a static E-Portfolio template for a client.
- Features a completely responsive design & impressive CSS animations.
- Built with HTML & CSS best practices.

#### Tesla Clone | Website | GitHub

- Developed a multi-page clone of the official Tesla website.
- Implemented user authentication and CRUD functionality with the use of Firebase.

## Ticket+ (Streaming Site) | Website | GitHub

- Developed a multi-page mock streaming site.
- Utilized the TMDB API and Axios to dynamically display data of both movies and TV shows.
- Implemented searching, advanced pagination and filtering.
